Hertz Internationally

Walter L. Jacobs founded hertz in 1918 in Chicago with an initial fleet of 12 Ford Model-T. After a number of changes in ownership it is bought out in 1994 by Ford Motor Company and operates as an independent subsidiary. In 1997 it went public in the New York Stock Exchange up until 2001, when it was completely bought out by Ford Motor Company and its shares were no longer negotiated in the NYSE. Since December 2005 Hertz belongs to 3 of the leading Investment Companies of Private Capital: Clayton, Dunilier & Rice, The Carlyle Group and Merrill Lynch Global Private Equity. In December 2006, Hertz went public once again in the NYSE.

Today, Hertz's headquarters are in Park Ridge of New Jersey and is the biggest company in the world in the field of car rental. At the same time, it constitutes the biggest company in the USA in the field of industrial and construction equipment rentals.

The name of Hertz is internationally associated with high quality car rentals. The company has the biggest system of car rental in the world with 8,000 sales points in over 140 countries, of which about 2,000 are in airports. Its world reservation centre handles 40 million phone calls and makes 30 million reservations a year. Its human resources exceed 30,000 staff, whereas its annual car purchases for the renewal or increase of its fleet make it the biggest private car purchaser in the world.

Hertz is directly involved in the business in big European countries through its subsidiaries whereas in smaller markets like Greece, it operates through a franchising system. Autohellas is the biggest Hertz franchisee globally.

Hertz in Greece - Brief History

Hertz Hellas is founded in Greece in 1962 as a subsidiary of Hertz international.

4 years later T. Vassilakis signs an agreement for the representation of Hertz in Crete with an initial fleet of 6 Volkswagen Beetle and in 1974 he buys Hertz Hellas and renames it to Autohellas and assumes the representation of Hertz in the whole of Greece. In 1989, Autohellas introduces for the first time in the Greek market, the institution of Fleet Management (long-term rental and fleet management) so as to cover the needs of different companies in the best possible way. In 2003, Autohellas buys Autotechnica Ltd, which is the national franchisee of Hertz in Bulgaria as well as importer/distributor of SEAT vehicles.

In June 2005 a new company starts in Cyprus which takes advantage of the representation of Hertz which was given to Autohellas for Cyprus, while since the beginning of 2007, Autohellas operates in the segment of fleet management in Romania through its new subsidiary Autotechnica Fleet Management SRL. The new company uses the Francisee lisence that Autohellas has for this country.

In 2010 Autohellas expanded therefore its presence to 5 countries: Greece, Bulgaria, Cyprus, Romania and Serbia.

On top of that, since July 2005, Autohellas ownes 50% of the shares of ELTREKKA S.A., which is a company involved in the trading and distribution of spare parts for cars and trucks. The other 50% belongs to ELTRAK.

In May 2008, a new company starts AUTOTECHNICA Hellas SA, as subsidiary of AUTOHELLAS SA, ownes 100%. The new subsidiary's activities are vehicle, management, maintenance and bodyshop work.

Hertz International - Contracts

The contract with Hertz international was renewed for 26 years on the 22.07.1998 being in effect since 01.01.1998, that is until 31.12.2023. According to this agreement, Autohellas has the exclusive right until the 31st of December of 2023 to use the name and the logos of Hertz in Greece, to receive information and know-how from Hertz as it concerns the car rental system as well as all the improvements in the sector of design and management of car rental services according to the Hertz system.

This exclusive agreement of particularly long duration (26 years) was made with Autohellas in view of its great success in the representation of Hertz in Greece in the last thirty years. This contract is the longest valid contract that Hertz has made internationally.

Through the international reservations system of Hertz, an immediate reservation is possible for every part of the world where Hertz is present. At the same time, all reservations from all over the world for Greece are immediately transferred to the reservation centre of Autohellas.

The royalties paid by Autohellas to Hertz International are calculated as a percent of different categories of income, such as days and mileage, insurance and various services.

3.1 Definitions

The Rent-a-Car sector is divided into two areas, Renting and Fleet Management (long term rental and fleet management) The Renting sector covers the rental needs of private individuals as well as companies for occasional and short-term rentals. The Fleet Management sector covers the long-term needs of clients for the rental and management of their fleet.

3.2 Information about the Sector

Tourist arrivals showed a Σ decrease in 2009, with an estimation of 15,9 mill tourists visiting Greece.

Year	Tourist Arrivals *	% Change
1997	10.070	
1998	10.916	8,4%
1999	12.606	15,5%
2000	13.567	7,6%
2001	14.057	3,6%
2002	14.918	6,1%
2003	14.784	-0,9%
2004	13.313	-9,9%
2005	14.765	10,9%
2006	16.089	9,0%
2007	17.518	8,9%
2008(E)	17.500	0,0%
2009(E)	15.925	-9,0%

* Source : National Statistical Service of Greece. The numbers of 2008 and 2009 are estimate.

The evidence so far suggests that the decrease in tourist traffic was close to 9 to 10% over the previous year. Depending initiated and industry short-term rental of Autohellas in Greece, the total turnover of the activity was initiated at the same percentages.

At the same time, the sector of Fleet Management continued to show the upward trend of the recent years, showing that it is a market which has not matured fully and as a result it will steadily contribute to the prospects for an increase in turnover for Autohellas. As the company is a leader in the sector for many years, it has both the experience and the infrastructure to take advantage of any market growth and steadily increase its market share, which is the company's long term strategy.

There are 2,500 R-A-C companies in Greece, with main characteristic in the short term sector being the small degree of concentration, as the average size of a Greek R-a-C business does not exceed 20 cars in contrast with other tourist countries such as Spain and Portugal.

As for the total of the rental market (short and long-term), five big companies (Autohellas/Hertz, Europcar, Avis and Piraeus Best Leasing) seem to have about 40-45% participation in the sector when it comes to total size like fleet of cars.

3.3 The progress of turnover per activity

3

At the Autohellas turnover showed a decrease in short-term rental (Rent a Car) by 10% while operating leasing moved in last year's levels, a decrease of 0.7%. The decrease in turnover is significant influence sales of used cars now appearing on turnover.

The following table presents the turnover progress of the company for the years 2004-2007.

(€)	Sales	Change	Fleet of cars	Change
2005	98.350.604,13	2.18%	23,500	4.7%
2006	107.054.496,96	8.85%	26,800	13.9%
2007	115,704,254.47	8.08%	28,700	7.09%
*2008	124,117,983.44	7.27%	30,100	4.88%
*2009	152,665,536.00	-7.98%	28,600	-4.98%

*Since 2008 the turnover occurs and the income from selling used. For 2009 and 2008 the total was 32,618,849 and 41,796,142 respectively. More information can be found in Note 21 to the Financial Statements.

The next table presents the progress of the volume of business (turnover) for the years 2005-2009 divided in the sectors of Renting and Fleet Management:

(mill. €)	Renting	Fleet Management
2005	31.5	66.9
2006	32.7	74.3
2007	33.4	82.3
2008	34.1	90.0
2009	30.7	89.4

3

Division of Sales between Renting & Fleet Management

It is worth noting once more that the high participation (as a percentage) of Fleet Management as a percent of the total turnover of Autohellas (74.4% of the total income) as a result of the medium-term contracts of 3.5 years reduces to a great extent the consequences of possible reductions or increases in the tourist business and constitutes a factor of stability as it allows greater foresight in the future course and the progress of company volumes.

Autohellas as a services company pays great attention to its human resources which constitute the heart of its operation.

Because of the great seasonality of short-term rentals, the company is obliged to have great flexibility as far as its human resources are concerned. It is for this reason that every year, especially in the period April – October, a significant number of seasonal employees is hired on a specific term contract to cover the increased needs of the company during the summer months. So the company has the ability to adjust the number of its employees according to the course of its business always achieving high levels of productivity. The service of more rental days while keeping staff at the same level is indicative of this productivity.

A. YEAR END – FINANCIAL POSITION RESULTS

Autohellas S.A. represents HERTZ largest national franchisee globally. By virtue of agreement, Autohellas S.A. has the exclusive right to use the Hertz brand name and trademark in Greece, to receive information and know-how relating to the operation of car rental system, as well as any improvements in designing and implementing rental services under the Hertz system. Autohellas extended this right in 1998 until the 31st of December 2023. This extraordinary in duration agreement has been granted to Autohellas as a result of Hertz' successful representation in Greece during the past 30 years

The company's main activities are Renting (Short – term lease) and Fleet Management (long – term lease and fleet management). Renting covers all needs of both individuals and companies for occasional, small duration rentals up to 1 year long.

Fleet Management covers any need for long duration rentals and management of their total fleet.

Autohellas total turnover for the 2009 reached 152.665.535,93 €, reporting a decrease of 8%.

In current fiscal year, amendments of IAS in relation to the sale of assets initially purchased for renting, have been implemented. As a result, relative income is reported in turnover with the relative expense reported as cost of goods. This change resulted in an increase of the company's turnover by \notin 32,618,849.49 and \notin 41,976,142.49 in 2009 and 2008 respectively.

In more detail, renting total turnover reached 30,7 mill. \in from 34,1 mill. \in last year, a decrease of 10%. Fleet Management reported a turnover of 89,4 mill. \in from 90 mill. \in in last year's respective period, a decrease of 0,1% despite the Greek economy depression and the substantial decrease in GDP.

The participation of Fleet Management in the consolidated turnover of Autohellas reached 74.4%, increasing each year the turnover's stability, since long term contracts have an average duration of 4 years. The group's consolidated turnover reported a decrease of 5.8%, reaching €176,015,436.71 from €186,838,622.54 in 2008.

Consolidated turnover, as a result of the aforementioned changes, was increased by € 35,394,313.23 and €44,367,002.84 in 2009 and 2008 respectively.

Consolidated earnings after tax showed an increase of 30.9% reaching €17,651,841.78 from €13,481,270.97 in 2008. Main reason for this increase was the smaller financial cost by €9.3m due to the smaller cost of loans. A dividend collected from the company's participation in Aegean airlines SA of amount €1.2 also contributed, as did the company's successful attempts to cut down on costs.

In more detail, Earnings after tax for Autohellas reached 11.963.434,89 \in from 10.920.269,44 \in in 2008. This increase of 9,6% came as a result of the reasons mentioned above Reduction in gross profit in comparison to the previous fiscal year came as a result of the reduction of Rent a car revenue, as well as a result of less earnings from used car sales

Group's fixed assets depreciations reached €54.4m in 2009, while consolidated earnings before tax, financial and investment activities, EBIT, reached €25,870,661.44 from €28,314,067.70 in 2008, a reduction of 8.6%. This was the result of Rent a car revenue decline as well as the reduction of earnings from used car sales.

Autotechnica Hellas ATEE, Autotechnica Ltd, Autotechnica Fleet Services S.R.L., Demstar Rentals 2005 Ltd and Autotechnica ATC Cyprus, comprise the five consolidated companies in the results of Autohellas SA.

Respectively, OLlympic SA., SPORTSLAND SA and ELTREKKA S.A. are consolidated by the net position method.

Autotechnica Hellas SA, is a daughter company of Autohellas SA (100% participation) and started its operation in April 2008. Its main activity is the exploitation of Workshop and bodyshop facilities as well as offering fleet management services. Initially, fleet management service involved only Autohellas's fleet, but towards the end of the year, third companies' fleet started to be added.

Total turnover, in 2009, reached €19.8mill and earning before tax €1.4 mill.

More specifically, Autotechnica ltd is Hertz's national franchisee in Bulgaria, while being the importer / distributor of SEAT cars. In 2009, turnover reached 9.9 million \in from 11.7 million \in in 2008, decreased by 15.4% with after taxes increasing by 56.9% reaching 1,454 thousand \in grow 926.6 thousand in 2008.

Demstar Rentals 2005 started its activity in June 2005 and it is Hertz's national franchisee in Cyprus. Autohellas has the licensee agreement, and this right has been assigned to Demstar Rentals 2005 Ltd. Autohellas participates by 75% in Demstar Rentals 2005, while the remaining 25% belongs to a Cypriot businessman. In August 2009, Autohellas proceeded with the full acquisition of this company, with participation now being 100%. Total investment was \in 3m. In 2009, total turnover reached \in 6.1m from \in 5.5m in 2008 while earnings after tax were \in 635.5 thousands from \in 397.2 thousands.

2008 was the first fully operational year for AUTOTECHNICA Fleet Services S.R.L. in Romania since it began its operation in 2007. The company operates in the fleet management sector only.

The turnover of 2008, 6,1 mill Euro from \in 3,7mill, is not indicative, since growth will be geometrical. Respectively, the profits reached 1.1million \in from loss of 543 thousand \in in 2008.

Autohellas SA posses 48.08% of the company Piraeus Best Leasing SA (participation amount \in 2,691,220.07). Piraeus Best Leasing was a similar to Autohellas company, with sole activity the vehicle Fleet management. The company had been bought by Piraeus and Autohellas and Pireus had the management. In September 2008, Piraeus Best leasing BoD decided to approve the merge plan between the companies Piraeus Best Leasing and Olympic Trade and Tourism company SA, and to establish a new company. The merge was approved by the relevant supervisory authority on the 31.12.2008. After the merge the participation percentage of Autohellas S.A is 20%.

In addition, Autohellas SA participates in the company ELTREKKA SA by 50% with ELTRAK SA holding the remaining 50% (participation amount 2,200,001.02€). ELTREKA SA is involved in importing, storing, trading and distributing cars' spare parts from many recognized brands, in the Greek market. Turnover in 2009 was €28.8m, with a loss of €555 thousand.

As of February 2008, Autohellas SA participates in the company Sportsland SA, with a total participation amount of €2,030,000 (participation percentage 50%). In May 2009, Autohellas SA participated on the share capital increase by €500,000 (50% out of a total share capital increase of €1,000,000). As a result total participation now is €2,530,000 (percentage 50%). The remaining 50% belongs to "Pilos Touristiki" SA.

As far as Aegean Airlines is concerned, Autohellas has an exclusive collaboration for the promotion of car rentals to its clients with Aegean Airlines.

B. IMPORTANT EVENTS

The most influential for the fiscal year 2009 events are:

- 1. The company's participation in Sportsland SA's share capital increase by €1,000,000 (participation percentage 50%, hence €500,000).
- 2. In May 2009 In May 2009, the tax audit for the fiscal years 2006 and 2007 was concluded . The tax audit assessed for the pre mentioned audited fiscal years additional taxes of €122,462. Autohellas SA has paid the full sum in a single payment. The company has already formed an adequate provision and hence the aforementioned additional taxes and penalties, has no effect on the company's 2009 financial results.
- 3. The General shareholder's meeting on the 24.06.2009, decided that a dividend of €0.12 per share will be distributed to the company's shareholders. Dividend payment begun on the 7th of July through the National Bank.
- 4. The acquisition of the remaining 25% of the minority rights of Demstar Rentals 2005 Ltd, at an amount €1,017,806.

C. RISK MANAGEMENT

Interest rate risk

The Company and the Group are exposed in possible interest rate fluctuations because of their adjustable interest rate loans. Interest rate reductions will benefit the company's earnings while increase will have the opposite effect. In 2009 the company has reduced its interest rate risk with interest derivatives accounting for 45% of its total loans.

Credit Risk

Company does not have any substantial credit risk. Retail sales are conducted either with cash payments or credit card charges.

Wholesales take place only after a thorough audit on the customer's financial reliability has been conducted, and in most cases advance payments or guarantees are obtained. In addition, the company pays close attention to it's credit collection period and acts accordingly. Potential credit risk does exist in the company's available cash, but the company uses recognized financial institutes for its deposits. In addition the company keeps higher loan liabilities in these institutes than its deposits.

Price risk

The group is exposed in price risk through the risk of possible fluctuations in the share price of Aegean Airlines SA in which the group participates. The economic situation has had a negative effect in the value of this participation, but the long term nature of this investment ensures the positive prospects.

The company is also exposed in used car price reduction risk, which is consider higher in current economic conditions. Company will react to this risk by increasing the average age of the fleet. By doing this, the company will by no means lose its competitive advantage since such a practice has been followed by all the companies in the sector.

Finally, both Group and the company are exposed in property value changes. During the first half of 2008 there was a change in the valuation method of the company's property, which is no longer valued based on their purchased cost, but on market fair value. As a result any changes to the real estate market will effect the fair value valuation. Due to the fact that most of the company's property is plots and office buildings in areas under development, no reduction of their value is expected.

Sales Seasonality

Rent a car sales (short – term rentals) are traditionally extremely seasonable, as they depend heavily on tourist arrivals. It is indicative that 80% of total sales is generated between May – October and almost 35-40%, in months July and August only. As a result, short – term sales can be affected substantially by events that have an impact on the Tourism market, especially if such events take place at the beginning of the season.

On the other hand, a major stability factor is the Fleet Management sales, since they are evenly spread within the year, while representing at the same time 3/4rds of the total annual turnover.

D. PROSPECTS

The Year 2010 is expected to be a particularly difficult year for Greece for those with nerves made of steel, where systems, people and business investments will be put to the test for their endurance. Global economy begins to slowly come out of recession in a very fragile financial climate.

In Greece, the severe recession along with the heavy increase of unemployment in all countries which traditionally are the source of our tourism, has left us in 2009 with a 10.5 % decrease in arrivals and an even greater one in days of stay and our tourism revenue. The local market stayed at the 2008 level. For 2010, the indications from the international tourism exhibitions in London and Berlin, are for the number of arrivals at the same level as 2009 and perhaps a small increase from the English market. Unfortunately, the result on the bad publicity that the Country is facing due to its financial state may, if continued, have a negative repercussion for the Europeans wanting to visit our country. Internally, the increase in unemployment, the low psychological level, the reduction of all investment plans and business trips, the general income cutbacks, will certainly have a significant impact on the short term leases, whether these concern local tourism, or corporate leases.

As for the long term rentals, the rate of growth is expected to decrease since more companies are trying to reduce their operational costs, including their company fleet. From our side, we have upgraded substantially our financial criteria regarding financing and leasing vehicles to our customers. Autohellas's goal for 2010 is to maintain our margins by maintaining a highly reliable and financially healthy customer list.

In Bulgaria, the main driving force for development will continue to be both short and long term vehicle renting. The country's tourism industry which in 2009 had a substantial decrease of 25%, is expected to have a small increase in 2010. The same does not apply for business development and the GNP is estimated to be from -0.5% to -2.5%. The continuing recession will keep the companies fleet rates of increase in low single digit figures, since the Operating Lease although the recess remains, the more frequent choice is for companies fleets.

Cyprus is a mature tourist market, mainly British, where in 2009 there was a 15% reduction in incoming tourism. For 2010, we expect, a positive scenario of a small increase or, at least, no more arrivals decrease. Nevertheless, taking into account the yet small magnitude of our share, there is a possibility, in this crisis, to succeed to increase our presence in a highly price competitive environment. The problem of vehicle "licensing" system still exists and unfortunately combined with the general financial crisis, is expected to slow down our growth rates in the fleet long term leasing sector.

In Romania, our long term outlook remains substantially promising, with the country's size having many opportunities for growth. Unfortunately for 2009, Romania showed one of the biggest financial problems, leading to substantial depreciation of the local currency RON and practically forcing all the foreign investments to freeze their expansion, or even withdraw in some cases. However, our leases are connected to a Euro clause, although paid in RON, so the company is not exposed to a high exchange rate risk.

For 2010 in Romania, no GNP increase is expected, on the contrary a decrease of 1%-2%. There is a hesitation regarding new investments, and the construction industry is practically in a standstill. Long term leases, combined with scepticism regarding credit reliability, lead to very low growth rates in long term leases for 2010.

The year 2010 finds us having undertaken the franchise of Hertz for Serbia, a country with great respective growth, while it proceeds with rapid steps into smooth joining of the European market attracting thus capital for investments from Europe. In this country we will intensify our efforts in the field of short term and long term leasing.

7.2.11. INDEPENDENT AUDITORS' REPORT

To the Shareholders of AUTOHELLAS S.A (HERTZ)

Report on the Separate and Consolidated Financial Statements

We have audited the accompanying financial statements (separate and consolidated) of AUTOHELLAS ATEE, which comprise the statement of financial position as at December 31, 2009, and the statement of comprehensive income, statement of changes in equity and cash flow statement for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, as adopted by the European Union and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects the financial position of AUTOHELLAS ATEE and its subsidiaries as at December 31, 2009, and of their financial performance and their cash flows for the year then ended in accordance with International Financial Reporting Standards, as adopted by the European Union

Report on Other Legal and Regulatory Requirements

We verified that the content of the Board of Directors' Report is consistent and correspond with the accompanying Financial Statements within the scope set by articles 43a, 107 and 37, of C.L. 2190/1920.

3. Accounting Policies

3.1 Basis for preparation of the financial statements.

These financial statements refer to the company Autohellas SA and the fiscal year 2009. They have been compiled according to the international financial standards as these have been adopted by the European Union.

Current financial statements have been based on historical cost, with the exception of available for sales financial assets valued in fair value, derivates valued in fair value and property which after 2008 are values in fair value. The above have been approved by the BoD on the 16th March 2010 and awaiting the approval of the General shareholders meeting, which will assemble on the 30th June 2010 and has the authority by law to amend.

Compiling the financial statements according to IAS requires the use of analytical accounting estimations and judgments regarding the implementations of the accounting principles. Any estimations or assumptions are mentioned in note 3.22.

3.2 New standards-interpretations

1. Standards and Interpretations with validity in the year 2009

In current fiscal year, the company and the group have applied the following new/amended standards.

- Revised IAS1, which had an effect only on the financial statement titles and the presentation of the income statements".
- Revised IFRS8. The group reports for the first time information per sector, based on how this information is presented internally in order to achieve the most efficient use of sources and to control operations in the most efficient way, as a result of the implementation of the criteria set by IFRS 8.
- Amendment of IFS 16 "tangible assets", based on which tangible assets which are rented to third parties and then sold as part of the company's regular activities, are transferred at the time of sale to inventory and are recognized as revenue from sales and cost of goods. This amendment has led into substantial increase of both turnover and cost of goods for both company and group. It had also an effect on the company's cash flows since the aforementioned elements are now recognized as operational and not investment cash flow.
- Revised IFRS 7 "financial figures Announcements" based on which additional announcements in relation to financial means have been reported, as far as hierarchy levels of fair values and maturity dates of liabilities and derivatives are concerned.

21. Standards and Interpretations with validity after the year 2009

- Other improvements in standards and interpretations were issued in April 2009. Standards are valid after 01.01.2010 and are not expected to have any substantial influence on the company's financial statements.
- Replacement of IFS 24 " announcements from related parties" in November 2009 valid for fiscal periods starting after the 01.01.2011. New standard simplifies the term "related parties" and states certain exceptions. It is not expected to have any substantial influence on the company's financial statements.
- IFRS 9 Financial information. Issued in 2009, valid after 01.01.2013. It is not expected to have any substantial influence on the company's financial statements.
- Amendment of IFRIC 14, issued on November 2009, valid for fiscal period starting on or after the 01.01.2011. This amendment does not apply on the company or group.
- IFRIC 19. Issued on November 2009 valid for fiscal periods starting on or after the 01.07.2010. This amendment does not apply on

the company or group.

- Amendment of IFS 32 issued on October 2009, valid for fiscal periods starting on or after 01.02.2010. This amendment does not apply on the company or group.
- Amendement of IFRS 1, issued on July 2009 and valid for fiscal periods starting on or after 01.01.2010. This amendment does not apply on the company or group.
- Amendment of IFRS 2 issued on 2009, valid for fiscal periods starting on or after 01.01.2010. This amendment does not apply on the company or group.
- Revised IFS 27 issued in January 2008, valid for fiscal periods starting on or after 01.07.2009. It is not expected to have any substantial influence on the company's financial statements.
- Revised IFRS 3, issued in January 2008, valid for fiscal years starting on or after the 01.07.2009. It is not expected to have any substantial influence on the company's financial statements.
- Revised IFRS 5 valid for fiscal periods starting on or after the 01.07.2009. It is not expected to have any substantial influence on the company's financial statements.
- Interpretation 17. Issued in November 2008, valid for fiscal years starting on or after 01.07.2009. This amendment does not apply on the company or group.
- IFRIC 18 clarifies the requirements of IFRSs for agreements in which an entity receives from a customer an item of property, plant, and equipment that the entity must then use either to connect the customer to a network or to provide the customer with ongoing access to a supply of goods or services (such as a supply of electricity, gas or water). In some cases, the entity receives cash from a customer that must be used only to acquire or construct the item of property, plant, and equipment in order to connect the customer to a network or provide the customer with ongoing access to a supply of goods or services (or to do both).

This interpretation does not apply to the Group or the Company.

3.3. Consolidation – Subsidiaries and Associates valuation

The acquisition cost of a subsidiary is the fair value of the assets, the shares issued and the liabilities undertaken on the date of the acquisition, plus any cost directly associated with the transaction. The individual assets, liabilities and contingent liabilities that are acquired during a business combination are valued during the acquisition at their fair value regardless of the participation percentage. The acquisition cost over and above the fair value of the individual assets acquired, is booked as goodwill. If the total cost of the acquisition is lower than the fair value of the individual assets acquired, the difference is immediately booked to the results.

Inter-company transactions, balances and unrealized profits between Group Companies are written-off. Unrealized losses are also written-off as long as there is no indication of impairment of the transferred asset. The accounting principles of the subsidiaries conform to the ones adopted by the group.

Associates are companies on which the group can exert significant influence (but not control), with a holding of between 20% and 50% of the company's voting rights. Investments in associates are valued using the equity method and are initially recognized at cost. The account investment in associates includes the goodwill less any decrease in its value.

The group's share in the profits or losses of associated companies after the acquisition is recognized in the income statement, while the share of changes in reserves after the acquisition is recognized in the reserves. When the group's share in the losses of an associate is equal than its participation in the associate, then, no further losses are recognized, unless further commitments have been made on behalf of the associate.

Participants of the parent company in subsidiaries and associates are valued at cost less any decrease in value.

3.4. Information per sector

- The group has 4 segments, and are the renting of vehicles in the countries of Greece, Cyprus, Boulgaria and Romania.
- The accounting policies for the operational sectors are the same as the ones described in the important accounting policies in the annual financial statements.
- The efficiency of each sector is measured based on the net income after taxes.
- Inter-sector sales refer to managerial support and are invoiced based on cost allocation.
- Operational sectors are strategic units and for that reason they are separately controlled by the board of directors .

3.5. Tangible assets

Own occupied tangible assets are values in updated (fair) value, every 3 to 5 years. Depreciation is calculated on the updated values. Initial purchase cost includes all costs involved in the purchase. There is no depreciation for plots. All other tangible assets are values on purchase cost minus depreciation. Depreciation rates are as follows:

Vehicles	2 – 5	Years
Buildings	30 – 35	Years
Mechanical equipment	6 - 7	Years
IT equipment	3 - 4	Years
Other equipment	5	Years

Vehicles residual values are being calculated based on their current values. No evaluations have been made raggedly the residual values of the rest tangible assets.

When the book value of tangible fixed assets exceeds their recoverable amount, the difference (impairment) is immediately booked as an expense in the results.

Upon sale of the tangible fixed assets, any difference between the proceeds and the book value are booked as profit or loss to the results.

3.6. Intangible asset

(a) Trade marks and licenses:

Trade marks and licenses are values at their acquisition cost less any accumulated depreciations. Depreciation is calculated using the straight line method over their useful lives which is 5 years.

(b) Computer software

Computer software licenses are reported at acquisition cost, less accumulated depreciation. Depreciation is calculated using the straight line method over their useful lives which is from 3 to 5 years.

3.7. Impairment of Assets

Assets that are depreciated are subject to an impairment review when there is evidence that their value will not be recoverable. The recoverable value is the greater of the net sales value and the value in use. Impairment losses are booked as expense when emerge.

3.8. Financial Assets available for sale, valued at fair value, with changes in fair value recognized in the results.

Financial assets available for sale are valued in their fair value and any change in the fair value, is booked in equity reserves until they are sold or characterized as impaired, at which time they are transferred to the results as profit or loss.

Derivatives which are not designated and effective hedging instruments, are valued at fair value, with any changes recognized through the income statement.

3.9. Counterbalance

Derivatives that fulfill the criteria for accounting cash flow counterbalance are valued in fair value. Any changes in fair value that relates to an efficient counterbalance are recognized as reserve in fair value through the other income statement and are transferred at the time when cash flow of counterbalance elements affect the results.

The ineffectual part of the counterbalance (retroactive or future) takes place on each balance sheet date.

3.10. Trade receivables

Receivables from customers are initially booked at their fair value which is equal to their face value less any impairment losses. Impairment losses (losses from doubtful dept) are recognized when there is objective evidence that the group is in no position to collect all relevant amounts, owned on the contractual terms. The impairment loss amount is calculated as the difference between the receivables book value and the future cash flow. The impairment losses are recognized in the income statement.

3.11. Cash and cash equivalents

Cash and cash equivalents include cash, cash at the bank as well as short term (up to 6 months), highly liquid and low risk investments.

3.12. Transactions in Foreign currencies

The transactions that are denominated in foreign currencies are stated in Euro on the basis of the exchange rates ruling on the date of the transaction. On the balance sheet date, monetary assets and liabilities that are denominated in foreign currencies are re-stated in Euro on the basis of the exchange rates ruling on this date. The gains and losses arising on restatement are recognized in the income statement

Any gains and losses arising from the conversion of foreign financial statements are recognized as net worth reserve.

3.13. Share Capital

Common stock is reported as equity. Expenses incurred for the issuance of shares reduce, after deducting the relevant income tax, the proceeds from the issue. Expenses incurred for the issuance of shares for the acquisition of companies are included in the acquisition cost of the company.

The cost of acquiring own shares, less the relevant tax, is reported as a negative balance within shareholders equity, until own shares are sold or canceled. Any profit or loss from the selling of own shares (after deducting the relevant costs), is reported as reserve on equity.

3.14. Loans

Loans are initially reported in their fair value, less any relevant transaction costs. Later they are valued on the unamortized cost using the actual interest rate.

3.15. Deferred income tax

Deferred income tax is determined according to the liability method which results from the temporary differences between the book value and the tax base of assets or liabilities. Deferred tax is calculated on the tax rates that are expected to be in effect during the period in which the asset or liability will regain its book value.

Deferred tax assets are recognized to the extent that these will be a future tax profit to be set against the temporary difference that creates the deferred tax asset.

3.16. Employee benefits

(a) Short term benefits

Short term employee benefits monetary and in kind are recognized as an expense when they accrue.

(b) Post employment benefits

Post employment benefits include defined contribution schemes as well as defined schemes. The accrued cost of defined contribution schemes is booked as an expense in the paid period it refers to.

The liability that is reported in the balance sheet with respect to this scheme is the present value of the liability for the defined benefit. The commitment of the defined benefit is calculated annually by an independent actuary with the use of the projected unit credit method. The field of long-term Greek Government Bonds is used as a discount rate.

3.17. Provisions

Provisions are recognized when the Group has present obligations (legal or constructive), as a result of past events and the settlement through an outflow is probable.

3.18. Recognition of income

Income includes the fair value of goods and services sold, net of value added Tax, discounts and returns. Intercompany revenue within the Group is eliminated completely. The recognition of revenue is done as follows :

(a) Income from services sold (Car Rentals)

Income from services sold are accounted for based on its completion percentage.

(b) Earnings from car sales

Earning from car sales is recognized at the stage when the basic risks and benefits associated with the ownership of the cars, are transferred to the buyer.

(c) Income Interest

Income interest is recognized on a time proportion basis using the effective interest rate.

(d) Dividends

Dividends are accounted as revenue, when the right to receive payment is established, in other words on the date the dividends are declared.

3.19. Leases (Group company as lessee)

Leases of fixed tangible assets, owned by the Group, with which all the risks and benefits are transferred, are registered as financial leases. Financial leases, are capitalized at the inception of the lease and are reported as liabilities with an amount equal to the net lease investment. The income from the payments is reported as a reduction of the liability and as a financial income, in a way that a constant periodic return on the net investment is ensured.

3.20. Dividend Distribution

The distribution of dividends to the shareholders of the parent company is recognized as a liability in the financial statements (parent and consolidated) at the date on which the distribution is approver by the General Meeting of the shareholders.

3.21. Financial risk management

Financial risk factors

(a) Credit Risk

Company does not have any substantial credit risk. Retail sales are conducted either with cash payments or credit card charges.

Wholesales are conducted only after a thorough audit on the customer's financial reliability has been conducted, and often advance payments or guarantees are obtained.

(b) Cash flow Risk

It is kept in very low levels due to the company's high credit limits.

(c) Cash flow Risk and risk of fair value fluctuations due to change in interest rates.

The company is exposed to interest rates risk since it has long term borrowing with adjustable interest rate, witch is outbalanced by interest derivatives. The company is currently using no accounting hedges to outbalance interest risk.

3.22 Important estimates

The most important estimate from the company's management for the application of the accounting policies regards the assessment of the vehicles residual value. A minor decrease in the residual values would result a major decrease in net income as well as the book value of the vehicles in the next fiscal year, by amounts that are not easy to estimate due to the current market volatility and the large number of different vehicles. This risk is being tackled currently through the company's conservative policy in regard to residual values which resulted in 2009 in a profit of \notin 4.598.312,93 for the group and \notin 3.712.243,91 for the company, even though substantial depreciation rates reductions took place in 2010.

4. Capital management

4.1. The company's policy as far as capital management is concerned is:

- To ensure the company's ability to continue uninterrupted its activities.
- To ensure a satisfactory return to its shareholders, by pricing the services affected in relation to the cost and always looking after its capital structure management.

Management is constantly monitoring the relation between equity and debt. In order for the company to achieve the desirable structure, the company may adjust the dividend, decide to return capital, or issue new shares. The term own capital includes total share capital, share capital paid in excess of par value and other reserves.

The term Debt includes all loans minus any cash available. So, the ratio Debt/Equity on the 31/12/2009 and 31/12/2008 for the company and the group is as follows:

COMPANY	31/12/2009	31/12/2008
Equity	107,986,388.16	97,763,191.67
Total borrowing	219,541,499.93	219,396,499.97
Minus: Cash deposits	51,741,879.21	24,218,091.59
Net borrowing	167,799,620.72	195,178,408.38
Debt / Equity	1.55	2.00

GROUP	31/12/2009	31/12/2008
Equity	120,288,598.24	105,403,050.86
Total borrowing	240,387,864.20	240,118,228.53
Minus : Cash deposits	53,540,353.88	24,541,307.38
Net borrowing	186,847,510.32	215,576,921.15
Debt / Equity	1.55	2.05

Company aims in retaining the ratio above 1 and up to 3.

4.2. There are certain limitations regarding own capital, deriving from current limited companies' legislation and in particular from Law 2190/1920. The limitations are:

- The purchase of own shares -with the exception of purchasing shares with sole purpose to be distributed among its' employeescannot exceed 10% of the company's share capital and cannot result in the reduction of own capital to an amount smaller than the amount of the share capital increased by the reserves, for which distribution is forbidden by law.
- In the case where total equity becomes smaller than ½ of the share capital, the Board of Directors is obliged to call up a General Assembly within a period of six months past the end of the fiscal period, in order to decide on the dissolution of the company or to take other measures.
- When the company's own capital becomes smaller than 1/10th of the share capital and the general shareholders meeting does not take the proper measures, the company may be dissolved by court order, on the request of anyone with an interest in law.
- Annually, at least 1/20th of the company's net profit is deducted to form an ordinary reserve, which will be used exclusively to balance, prior to any dividend distribution, the possible debit balance in the earnings carried forward account. Forming such a reserve is not obligatory, once it reaches 1/3rd of the company's share capital.
- The deposit of the annual dividend to shareholders in cash, at an amount equal to at least 35% of the company's net earnings, after deducting the regular reserve and the net result from the evaluation of the company's assets and liabilities at fair value, is obligatory. The above does not apply if the general assembly decides it, by a majority of at least 65% of the total share capital. In this case the dividend that hasn't been distributed and up to an amount equal to 35% of the above mentioned net earnings, has to be reported in a special account "Reserve to be Capitalized", within 4 years time, with the issue of new shares, given to shareholders.
- Finally, a general shareholders meeting can decide not to distribute a dividend, if it is decided by a majority of over 70%.

4.3 The company is in compliance with all obligations deriving from all relevant provisions and regulations in relation to own capital.

The group records the level of receivables and makes a provision for doubtful debts, if a collection risk is acknowledged. To recognize a possible incapability of collection the group might judge based on how long the debt exists (over one year), the bankruptcy of the debtor or the debtors incapability to meet his payment deadlines in general. Provisions are also considered any amounts that are legally claimed despite any possible partial collection.

In general, the company will claim the receivables in court only after a 3 months grace period has expired and only if the amount justifies the cost of legal action.

Fair value of the receivables are almost identical to their book value. In a similar manner, the maximum credit risk, without taking into account any guarantees and credit assurance, is equal to the receivables book value.

32. Change in accounting policy

During the period 01.01-31.12.2008 there has been a change in the accounting method used to evaluate the company's property since management decided that its high value should be reported in the financial statements of the Group and the Company.

The valuation was conducted by a recognized independent appraiser according to IFS 16 for owner occupied assets and IFS 40 for investment properties.

More specifically:

a) Own occupied property (plots-buildings) has been measured from 01.01.2008 in readjusted (fair) values and not in purchase cost, which was the valuation method up until 31.12.2007.

As a result:

- i) Own capital in the 01.01.2008 has been increased through net readjustment reserve by 15.565.130,78€ (gross amount €19.163.611,91– deferred income tax €3.598.481,13.
- ii) Results for the period 01.01-31.12.2008 have been burdened with negative net difference from readjustments of amount 456.392,32€ (gross amount 608.523,09€- income tax 152.130,77€).
- iii) The owner- occupied property value for the period 01.01.2008 has increase by €20,188,535.25.
- iv) The effect on results for the period (01.01-31.12.08 due to increased depreciation on the readjusted values in relation to the purchase cost and the abolishment of depreciation on the investment properties is minimum.
- b) The investment in property is measured based on fair value and not on purchase cost, which was the valuation method up until 31.12.2007. Effects in current period are related with the lack of depreciation and are minimum.

In 2008 and as from 01.07.2008, vehicles depreciation rate in Bulgaria changed from 25% to 15% and in Romania from 25% to 17%. As from 01.04.09 depreciation rate in Bulgaria changed from 15% to 18% and in Romania from 17% to 18%, in order to achieve a more accurate representation of the relation between purchase and sale of vehicles in the current turbulent market conditions.

Had the subsidiaries in Bulgaria and Romania not used the rate of 15%/18% and 17%/18% respectively, total depreciation of vehicles for the current period would have been increased by €876,039.14.

The effect of the depreciation rate change in current fiscal period, 01.04.2009 – 31.12.2009 in the financial statements is approximately €475,000. Volatile market environment makes it impossible to make any accurate future periods estimation.

- 2. As mentioned in note 3.2. in current period IAS 16 and IAS 7 amendments in relation to sale of assets initially purchased for renting have been applied. Based on the above amendments sales of vehicles initially purchased for renting, will be reported at the time of sale as turnover with the relative financial burden reported as cost of sales and not as (NET) profit/loss from sale. At the same time, in cash flow statement, cash inflow/ouflow from sale/purchase of vehicles are reported in operating activities and not investment activities. The consequences of these amendments are as follows:
 - i) For the period 01.01-31.12.2008 an amount of € 41,796,142.49 has been added to sales and refers to vehicle sales. In cost of goods, € 36,220,804.19 has been added and refers to the cost of vehicles sold. From other income, amount of € 5,575,338.30 initially reported as profits from car sales has been deducted. For the group, in turnover an amount of € 44,367,002.84 has been added, in cost of goods €37,801,236.82 has been added, while € 6,565,766.02 has been deducted from other income
 - ii) In cash flow statement outflow for vehicle purchase and inflow from vehicle sales are reported in operating activities instead of investment activities up until 31.12.2008. In more detail for the group and company, for the fiscal year 01.01.-31.12.2008 the amounts that have been transferred are: vehicle purchase 121,302,827.14 and 100,797,751.91 and vehicle sales 44,864,663.35 and 42,298,763.58, for the group and the company respectively.

33. Sensitivity Analysis

The following table presents and analyses the sensitivity of the company's results and its net worth in relation to the financial assets and liabilities, as far as interest rate risk is concerned, the foreign exchange risk and the market risk.

1. Credit risk

The Company and the Group are exposed to interest rate risk, deriving from :

- a) the adjustable interest rate loans, as well as from interest bearing deposits and deposits with adjustable interest rate. The sensitivity analysis assumes the parallel fluctuation of interest rates by ±100 kps and its impact will be reflected on the results
- b) A change in derivatives fair value used to leverage the interest rate risk ,although accounting leverage is not used. These derivatives are affected by interest fluctuations and the sensitivity analysis assumes the fluctuation by ±100bps of interest rates and by ±50bps of the curve steepness, other things being equal. The impact is reflected on the results.
- c) Change of the fair value of derivatives used for financial hedging of interest risk, where partial hedging is applied. These derivatives are influenced solely by changes in interest raters and the sensitivity analysis assumes interest rates fluctuation of +- 100bps (base units). The effect is reflected on equity in all cases where hedging is applied and on the results were hedging is not

2. Foreign exchange risk

- a) The company is exposed in a small exchange risk from liabilities in US dollars. The sensitivity analysis assumes change in the exchange rate €/US\$ by ±10% with its impact reflected on the results.
- b) The Group is exposed in exchange risk from its subsidiaries' liabilities, in a currency different than their local operating currency. In more detail, the subsidiary in Romania has liabilities in RON. The sensitivity analysis assumes a change in the exchange rate \notin /RON by $\pm 10\%$ with the impact reflected on the results.

3. Market Risk

The Company and the Group are exposed in risk from:

Any change of the share price of available for sale financial asset. The sensitivity analysis assumes a change in the share price by $\pm 10\%$ and the change is reflected in the Company's net worth.
