Hertz Internationally

Walter L. Jacobs founded hertz in 1918 in Chicago with an initial fleet of 12 Ford Model-T. After a number of changes in ownership it is bought out in 1994 by Ford Motor Company and operates as an independent subsidiary. In 1997 it went public in the New York Stock Exchange up until 2001, when it was completely bought out by Ford Motor Company and its shares were no longer negotiated in the NYSE. Since December 2005 Hertz belongs to 3 of the leading Investment Companies of Private Capital: Clayton, Dunilier & Rice, The Carlyle Group and Merrill Lynch Global Private Equity. In December 2006, Hertz went public once again in the NYSE.

Today, Hertz's headquarters are in Park Ridge of New Jersey and is the biggest company in the world in the field of car rental. At the same time, it constitutes the biggest company in the USA in the field of industrial and construction equipment rentals.

The name of Hertz is internationally associated with high quality car rentals. The company has the biggest system of car rental in the world with 8,000 sales points in over 140 countries, of which about 2,000 are in airports. Its world reservation centre handles 40 million phone calls and makes 30 million reservations a year. Its human resources exceed 30,000 staff, whereas its annual car purchases for the renewal or increase of its fleet make it the biggest private car purchaser in the world.

Hertz is directly involved in the business in big European countries through its subsidiaries whereas in smaller markets like Greece, it operates through a franchising system. Autohellas is the biggest Hertz franchisee globally.

Hertz in Greece – Brief History

Hertz Hellas is founded in Greece in 1962 as a subsidiary of Hertz international.

4 years later T. Vassilakis signs an agreement for the representation of Hertz in Crete with an initial fleet of 6 Volkswagen Beetle and in 1974 he buys Hertz Hellas and renames it to Autohellas and assumes the representation of Hertz in the whole of Greece. In 1989, Autohellas introduces for the first time in the Greek market, the institution of Fleet Management (long-term rental and fleet management) so as to cover the needs of different companies in the best possible way. In 2003, Autohellas buys Autotechnica Ltd, which is the national franchisee of Hertz in Bulgaria as well as importer/distributor of SEAT vehicles.

In June 2005 a new company starts in Cyprus which takes advantage of the representation of Hertz which was given to Autohellas for Cyprus, while since the beginning of 2007, Autohellas operates in the segment of fleet management in Romania through its new subsidiary Autotechnica Fleet Management SRL. The new company uses the Franchisee licence that Autohellas has for this country.

In 2010 Autohellas expanded therefore its presence to 5 countries: Greece, Bulgaria, Cyprus, Romania and Serbia.

On top of that, since July 2005, Autohellas owns 50% of the shares of ELTREKKA S.A., which is a company involved in the trading and distribution of spare parts for cars and trucks. The other 50% belongs to ELTRAK.

In May 2008, a new company starts AUTOTECHNICA Hellas SA, as subsidiary of AUTOHELLAS SA, owns 100%. The new subsidiary's activities are vehicle, management, maintenance and bodyshop work.

Hertz International – Contracts

The contract with Hertz international was renewed for 26 years on the 22.07.1998 being in effect since 01.01.1998, that is until 31.12.2023. According to this agreement, Autohellas has the exclusive right until the 31st of December of 2023 to use the name and the logos of Hertz in Greece, to receive information and know-how from Hertz as it concerns the car rental system as well as all the improvements in the sector of design and management of car rental services according to the Hertz system.

This exclusive agreement of particularly long duration (26 years) was made with Autohellas in view of its great success in the representation of Hertz in Greece in the last thirty years. This contract is the longest valid contract that Hertz has made internationally.

Through the international reservations system of Hertz, an immediate reservation is possible for every part of the world where Hertz is present. At the same time, all reservations from all over the world for Greece are immediately transferred to the reservation centre of Autohellas.

The royalties paid by Autohellas to Hertz International are calculated as a percent of different categories of income, such as days and mileage, insurance and various services.

3.1 Definitions

The Rent-a-Car sector is divided into two areas, Renting and Fleet Management (long term rental and fleet management)

The Renting sector covers the rental needs of private individuals as well as companies for occasional and short-term rentals.

The Fleet Management sector covers the long-term needs of clients for the rental and management of their fleet.

3.2 Information about the Sector

Tourist arrivals showed a decrease in 2010, with an estimation of -10 mill tourists visiting Greece.

* Source : National Statistical Service of Greece. Figures for 2008 and 2009 are estimate.

The company's Rent-a-Car sector's revenue showed a decrease of 6.8%, a decrease which is substantially lower than the markets decrease in arrivals.

Fleet management revenue reported a small decrease of -3.5% as a result of the domestic companies' attempt to lower their operational costs and as a result operate smaller company fleets. At the same time, Autohellas's main focus in the last couple of years is the sustainability of profitability through a reliable and financially strong customer list. This is why the company has initiated a much stricter customer evaluation proccess for our fleet management business.

3.3 The progress of turnover per activity

Autohellas' turnover in the RaC sector showed a decrease of 6,8% while operating leasing reported a decrease of -3,5%. Total turnover decrease is also significantly influenced by sales of used cars, a revenue reported in turnover as well.

The following table presents the turnover progress of the company for the years 2004-2010.

(€)	Sales	Change	Fleet of cars	Change
2005	98,350,604.13	2.18%	23,500	4.7%
2006	107,054,496.96	8.85%	26,800	13.9%

*2010	144,519,772.76	-5.3%	26,800	-6.3%

** as from 2008 income from selling used cars is reported in turnover. For 2010 this amount was €29,485,896.07. 2009 and 2008 figures were €32,618,849 and €41,796,142 respectively. More information can be found in Note 21 to the Financial Statements.*

The following table presents the company's revenue for years 2005-2010 by sector (Renting and Fleet Management):

(mill. €)	Renting	Fleet Management
2005	31.5	66.9
2006	32.7	74.3
2007	33.4	82.3
2008	34.1	90.0
2009	30.7	89.4
2010	28.6	86.4

Division of Sales between Renting & Fleet Management

Fleet Management's high participation (as a percentage) on total turnover (75.1% of total operating income) as a result of the medium-term contracts of 3.5 years, reduces to a great extent the consequences of possible reductions or increases in the tourist business and constitutes a factor of stability as it allows greater foresight in the future course and the progress of company volumes.

COMPARISON OF CHANGE IN RENTING SALES AND TOURIST ARRIVALS IN GREECE

Autohellas as a services company pays great attention to its human resources which constitute the heart of its operation.

Because of the great seasonality of short-term rentals, the company is obliged to have great flexibility as far as its human resources are concerned. It is for this reason that every year, especially in the period April – October, a significant number of seasonal employees is hired on a specific term contract to cover the increased needs of the company during the summer months. So the company has the ability to adjust the number of its employees according to the course of its business always achieving high levels of productivity. The service of more rental days while keeping staff at the same level is indicative of this productivity.

A. YEAR END – FINANCIAL POSITION RESULTS

Autohellas S.A. represents HERTZ largest national franchisee globally. By virtue of agreement, Autohellas S.A. has the exclusive right to use the Hertz brand name and trademark in Greece, to receive information and know-how relating to the operation of car rental system, as well as any improvements in designing and implementing rental services under the Hertz system. Autohellas extended this right in 1998 until the 31st of December 2023. This extraordinary in duration agreement has been granted to Autohellas as a result of Hertz' successful representation in Greece during the past 30 years

The company's main activities are Renting (Short – term lease) and Fleet Management (long – term lease and fleet management). Renting covers all needs of both individuals and companies for occasional, small duration rentals up to 1 year long.

Fleet Management covers any need for long duration rentals and management of their total fleet.

Autohellas total turnover reached 144,519,772.76 €, reporting a decrease of 5,3% versus last year.

In 2009, amendments of IAS in relation to the sale of assets initially purchased for renting, have been implemented. As a result, relative income is reported in turnover with the relative expense reported as cost of goods. This change resulted in an increase of the company's turnover by 29,485,896.07€ and 32,618,849.49€ in 2010 and 2009 respectively.

In more detail, renting total turnover reached 28.6 mill. € from 30.7 mill. € last year, a decrease of 6,8%. Fleet Management reported a turnover of 86.4 mill. € and 89.4 mill. € in last year's respective period, a decrease of 3,4%, despite the Greek economy depression and the substantial decrease in GDP.

The participation of Fleet Management in the consolidated turnover of Autohellas reached 75,1% increasing each year the turnover's stability, since long term contracts have an average duration of 4 years. The group's consolidated turnover reported a decrease of 3.5%, reaching 169.828.862,77 € from 176.015.436,71 € in 2009.

Consolidated turnover, as a result of the aforementioned changes, was increased by € 32,636,301.35 and 35,394,313.23€ in 2010 and 2009 respectively.

Consolidated earnings after tax showed a decrease of 18.6% reaching 14,362,221.77 € from 17,651,841.78 € in 2009. Main reason for this decrease was the the reduction in turnover and the imposition of the special contribution of 1.5 million€.

In more detail, Earnings after tax for Autohellas reached 17,231,453.63 € from 11,963,434.89 € in 2009, an increase of 44% due to profit from the sale of Olympic Commercial and Tourist Enterprises SA. The profit for the most part has been included in the consolidated

financial statements of previous years since the Olympic Commercial and Tourist Enterprises SA was consolidated by the equity method. The decrease in gross profit compared to the previous year due to reduced revenue as stated above, while reducing the profit from the sale of cars.

Group's fixed assets depreciations reached 55,4 εκ.€ in 2010, while consolidated earnings before tax, financial and investment activities, EBIT, reached 22.817.673,64€ from 25.870.661,44€ in 2009, a reduction of 11.8%. This was the result of Rent a car revenue decline as well as the reduction of earnings from used car sales.

C. CORPORATE GOVERNANCE

• Introduction

The company has adopted the principles of Corporate Governance in compliance with existing Greek legislation. By adopting it the company will improve its governance practices, its competitiveness as well as enhance its transparency towards the company's shareholders.

The Company has voluntarily decided, following the publication of L.3873/2010, to espouse the code of corporate governance of the Hellenic Federation of Enterprises (SEV) (called hereinafter "code").

This code can be found at SEV website at the following web address: http://www.sev.org.gr/Uploads/pdf/KED_TELIKO_JAN2011.pdf

This corporate Governance statement explains in detail how the company has applied the principles set out by the code and clarifies the deviations from it.

• The Board Of Directors and Committees

Board Of Directors

The Board of Directors is responsible for the management of the company's affairs to the benefit of the company and its shareholders, always in line with the company's corporate strategy and within the existing regulatory framework.

The Board of Directors is empowered to decide for all matters relating to the business affairs of the company, other than those excluded

Committees:

According to article 37 of Law 3693/2008 every listed company in the Athens Stock Exchange ("of public interest" according to the Law) is obliged to have an "Audit Committee" consisting of 3 Board of directors' members. Two of them must be non-executive members and the other one a non-executive independent member.

The company's Audit committee consists of the following Board of Directors's members:

- Georgios Vassilakis, Non-executive member
- Spyridon Flegas, Independent non-executive member
- Stefanos Kotsolis, independent non-executive member

The Audit committee ensures that the internal and external audits within the company comply with the statutory requirements and are effective and independent. The audit committee also serves to facilitate good communication between the auditors and the Board of Directors. The Audit committee oversees the annual statutory audit and the half year statutory review as well as the on-going audit work that is performed by the internal audit department of the company. It ensures that all recommendations of external and internal audits are implemented by the company's management.

The audit committee evaluates the internal audit reports and the availability of human resources and equipment of the internal audit department.

The audit committee also evaluates the appropriateness of the system of internal control, computer system and security, as well as the reports of the external auditors concerning the financial statements. It also follows the procedure of financial information and the efficient operation of the risk management system. Finally, it is burdened with the task of providing its opinion to the Board of Directors in order for it to propose to the General Shareholders Meeting the appointment of the external auditors.

The Committee meets a minimum of 4 times per year.

• Internal Audit

Internal audit system has been defined as a process effected by an entity's board, management and other personnel, designed to provide reasonable assurance regarding the effectiveness and efficiency of corporate operations, reliability of financial reporting and compliance with applicable laws and regulations.

The evaluation and control of the company's internal audit system, like periodic audits, inspection of the proper functioning of the company's IT and Data systems from which all information is acquired when financial statements are made, as well as identifying any possible weaknesses and suggestions on improvements are made by the audit committee. The committee has access to any department, document or file that is considered important in order for the committee to proceed with its duties in the most efficient way. The Audit Committee is an independent committee. Board of Director's members, management and all members of staff are obliged to cooperate and provide any required information to the Audit committee and in general facilitate the committee's needs and requirements in the best possible way.

The company also has in place systems and procedures for exercising control and managing risk in respect of financial reporting and the presentation of company and consolidated financial statements.

These include:

- The formulation and deployment of accounting policies and procedures.
- Procedures that ensure the correct and full reporting of all company's transactions.
- Procedures to ensure that all transactions are recorded in accordance with international financial reporting standards (IFRS)
- Procedures that ensure limited access to the company's accounting principals used in order to ensure its integrity.
- Constant personnel training.

- Write-offs and reserves are clearly defined, consistently applied and monitored.
- Fluctuation analysis of actual to budget and prior years, in order to identify unusual transactions, thus ensuring the accuracy and completeness of the results and allow corrective action planning.

• Communicating with Shareholders

The Board of Directors has appointed an Investor relations officer with main duties to provide immediate and accurate information on the company as well as clarifications on their rights.

The chairman and vice chairman are available to meet shareholders with significant share in the company to discuss eventual governance concerns. In addition, the chairman should ensure that the views of the shareholders are communicated to the whole board.

The company also maintains an investor relations page on its website where shareholders and possible investors can find useful information on the company.

• General Shareholders Meeting

The General Shareholders Meeting is according to the company's articles of association the supreme Board of Directors of the company. It decides on all affairs and its resolutions taken are obligatory for all shareholders.

The general shareholders meeting is convened by the Board of Directors and takes place in a time and place set by the Board of Directors within the first 6 months following the end of each fiscal year.

The convene of the General shareholders meeting takes place at least 20 days prior to the date of convention, through an invitation which clearly states the time and place, the agenda and the procedures that shareholders are required to follow in order to have a voting right at the meeting. The invitation is made in accordance to Greek Law and is posted on the company's website in both Greek and English Language. It includes information :

- The date, time and place of the convocation of the General Shareholders meeting.
- The basic rules and practices regarding the participation of the shareholders, including the right to introduce topics in the agenda, to make enquiries and the deadline for the exercise of these rights.
- The voting procedure, the terms and conditions for proxy voting and the necessary forms and documents for proxy voting.
- The proposed agenda of the General Shareholders meeting including draft resolutions and any other accompanying documents.
- The list of proposed Board of Directors members and their resumes (in case of election of Board of Directors members).

At least the chairman of the Board of Directors, or the vice Chairman and the Managing Director attend the General Shareholders meeting and provide shareholders with all necessary information with regard to the items of the agenda and to the questions raised by the shareholders. The chairman of the General Shareholders meeting ensures that adequate time is given to the shareholders to raise any questions they may have.

Voting on all resolutions takes place by means of a poll which ensures that all shareholders votes are taken into account, whether lodged in person at the meeting or by proxy.

The chairman of the board, the managing director the chairmen of each board committees, as well as the internal and external auditors are always available to answer shareholders questions.

The shareholders rights are set out in the Company's Articles of Association and in the Codified Law 2190/1920 as in force.

• Risk Management**Exchange rates Risk**

Almost all of the company's receivables and liabilities are in Euro and as a result exposure in exchange rate risk is almost nonexistent. In the same way, the company's subsidiaries do not expose the company to any substantial risk due to both their small size and the currency they use.

Interest rate risk

The Company and the Group are exposed in possible interest rate fluctuations because of their adjustable interest rate loans. Interest rate reductions will benefit the company's earnings while any increase will have the opposite effect. In 2009 the company has reduced its interest rate risk with interest derivatives accounting for 45% of its total loans.

Credit Risk

Company does not have any substantial credit risk. Retail sales are conducted either with cash payments or through credit card charges.

Wholesales take place only after a thorough audit on the customer's financial reliability has been conducted, and in most cases advance payments or guarantees are obtained. In addition, the company pays close attention to its credit collection period and acts accordingly. Potential credit risk does exist in the company's available cash, but the company uses recognized financial institutes for its deposits. In addition the company keeps higher loan liabilities in these institutes than its deposits.

Price risk

The group is exposed in price risk through the risk of possible fluctuations in the share price of Aegean Airlines SA in which the group participates. Current economic environment has had a negative effect in the value of this participation since the reduction in Aegean Airline's share price has had a negative effect in the total income of €7,026,046. It must be said though that in general, the growth prospects for this company are certain due to the long term nature of this investment and the dominant position the company has in the market.

The company is also exposed in used car price reduction risk, which is considered higher in current economic conditions. But it is our belief that during 2010 the prices for used cars have reached what is considered to be the bottom line. Company has reacted to this risk by increasing the average age of the fleet. This strategic decision has not, in any way, affected the company's competitive advantage since such a practice has been followed by all the companies in the sector.

Finally, both Group and the company are exposed in property value changes. During the first half of 2008 there was a change in the valuation method of the company's property, which is no longer valued based on their purchased cost, but on market fair value. As a result any changes to the real estate market will affect the fair value valuation. The company has re-valued its property at the end of 2010 and no decrease in total value has been recorded. Due to the fact that most of the company's property is plots and office buildings in areas under development, no reduction of their value is expected.

Sales Seasonality

Rent a car sales (short – term rentals) are traditionally extremely seasonable, as they depend heavily on tourist arrivals. It is indicative that 80% of total sales is generated between May – October and almost 35-40%, in months July and August only. As a result, short – term sales can be affected substantially by events that have an impact on the Tourism market, especially if such events take place at the beginning of the season.

On the other hand, a major stability factor is the Fleet Management sector, since sales are evenly spread during the year, while representing at the same time 3/4rds of the total annual turnover.

• **Deviations from the corporate Governance Code and Justification**

- The Board of Directors has not established a separate committee, which manages the procedure for candidates seeking election in the Board of Directors and prepares proposals regarding compensations for the Board of Directors members and top management. Company's policy has always been to involve management and supervisors in the decision making regarding compensations and this policy has been stable and successful for at least two decades.
- Each elected Board of Directors serves for 5 years. The 1/3 of the Board of Directors does not consist of independent non-executive members. It consists of 6 executive members, one non-executive member and two independent non-executive members. With this balance the efficient and productive operation has been ensured during previous years.
- There is no obligation of any disclosure of professional commitments of Board of Directors members (including important non-executive commitments to companies and non-profit institutions) before their appointment to the board, or restriction on the number of Boards of listed companies in which they can participate, as long as all board members can meet their duties, devote sufficient time to them and keep abreast of developments in the matters relating to their duties.
- The appointment of an executive member to a company that is not affiliated or associated does not require an approval by the board.
- There is no committee for selecting candidates for the Board of Directors, as due to the structure and operation of the Company this committee is not considered as necessary at this time.
- In the beginning of each calendar year the Board of Directors does not adopt a calendar off meetings and a 12-month program of action, as the convergence and the meeting of the Board is easy, when the needs of the Company or the law render it necessary, without a predetermined plan of action.
- There are no introductory programs in place by the Board of Directors for new board members, or continuing vocational training for other members, as only individuals with proven expertise and management skills are proposed for election as members.
- There is no institutional procedure to evaluate the effectiveness of the Board of Directors and its committees.
- The internal audit office does not report to the Managing director. The staff of the Internal audit and the members of the audit Committee perform their duties independently and hierarchically do not fall under any other department of the company. The head of Internal Audit is supervised by the Audit committee. The head of Internal Audit is appointed by the Board of Directors and has all necessary qualifications and experience.
- The Board of Directors does not perform an annual evaluation of the internal audit procedures as the audit committee reviews and reports to the Board of Directors on the internal Audit's Annual Report.
- There is no special rule for the operation of the audit committee, as its main duties and authorities are adequately set by Law.

D. PROSPECTS

2011 is expected to be a particularly difficult year for Greece for those with nerves made of steel, where systems, people and business investments will be put to the test for their endurance. Even though global economy seems to be slowly recovering, Greek economy seems to be in a very bad shape.

In Greece, the severe recession along with the heavy increase of unemployment in all countries which traditionally are the source of our tourism, has left us in 2010 with a 10% decrease in arrivals and an even greater one in days of stay and our tourism revenue. This reduction followed a 10.5% reduction in arrivals during the previous year (2009). The domestic market showed an even bigger decrease.

Unfortunately, the result on the bad publicity that the Country is facing due to its financial state may, if continued, have a negative repercussion for the Europeans wanting to visit our country.

In the domestic market, the increase in unemployment, bad psychology, the reduction in all investment plans and business trips, income cutbacks, will certainly have a significant impact on the short term leases, whether these concern local tourism, or corporate leases.

For 2011, the messages that we get from international tourism fairs in London and Berlin are for the first time in the last couple of years, positive, with arrivals estimated to increase at high single digit percentage.

As for fleet management, the rate of growth is expected to decrease further since more companies are trying to reduce their operational costs, including their company fleet. From our side, we have upgraded substantially our financial criteria regarding financing and leasing vehicles to our customers. Autohellas's goal for 2011 is to maintain our margins by maintaining a highly reliable and financially healthy customer list.

In Bulgaria, the main driving force for growth will continue to be both short term rentals and fleet management. The country's tourism industry which in 2009 had a substantial decrease of 25%, showed a small 3.2% increase in 2010 and we expect a similar increase in the following year. Business and GDP growth showed no increase following a -5% reduction in 2009. The estimated growth of 2.5% for 2011 is expected to keep the corporate fleet growth to low single-digit numbers as Operating Lease remains the best choice for maintaining corporate fleets.

Cyprus is a mature tourism, mainly British market, and reported a 6% increase in arrivals following a 15% reduction in 2009. 2011 arrivals are expected to increase especially after the events in the countries of North Africa. Considering small size of our share, it is possible to increase our presence in a very competitive pricing environment. The problem of the vehicle "licensing" system still exists and unfortunately combined with the general financial crisis, is expected to slow down our growth rates in the operating leasing sector.

In Romania, our long term outlook remains substantially promising, with the country's size having many opportunities for growth in the long term. Unfortunately for 2009, Romania was faced with huge financial problems, leading to substantial depreciation of the local currency RON and practically forcing all the foreign investments to freeze their expansion, or even withdraw in some cases. However, our leases are connected to a Euro clause, although paid in RON, so the company is not exposed to a high exchange rate risk. The reduction in GDP by 7.1% in 2009 was followed by a further reduction of 1.9% in 2010. There is clearly a reluctance to undertake new investment and construction has practically fallen into stagnation. The projected low GDP growth (1.5%) combined with the reluctance on financial credit, seems to be leading to very low growth rates for 2011.

In 2010 we were granted the franchisee licence for the country of Serbia, a country with significant growth prospects and a in a stable course to the European mainstream, attracting major investment funds from Europe. In this country operations begun in April and we operate in both short and operating leasing sectors. There have been no events after the publication date of the balance sheet that effect in any way the financial statements of the Company or Group.

7.2.11. INDEPENDENT AUDITORS' REPORT

To the Shareholders of AUTOHELLAS S.A (HERTZ)

Report on separate and consolidated Financial Statements

We have audited the accompanying financial statements (separate and consolidated) of AUTOHELLAS ATEE, which comprise the statement of financial position as at December 31, 2010, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements.

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility.

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of AUTOHELLAS ATEE as at December 31, 2010, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

Report on Other Legal and Regulatory Requirements

Subsidiary companies are consolidated with the full consolidation method, as from the date on which control is acquired over them and are excluded as from the date on which such control ceases to exist. Associated companies are companies which are under substantial managerial influence. Joint ventures are companies under joint management. Both associated companies and joint ventures are consolidated with the net position method.

3. Accounting Policies

3.1 Basis for preparation of the financial statements.

These financial statements refer to the company Autohellas SA and the fiscal year 2010. They have been compiled according to the international financial standards as these have been adopted by the European Union.

Current financial statements have been based on historical cost, with the exception of available for sales financial assets valued in fair value, derivatives valued in fair value and property which after 2008 are valued in fair value. The above have been approved by the BoD on the 15th March 2011 and awaiting the approval of the General shareholders meeting, which will assemble on the 30th June 2011 and has the authority by law to amend.

Compiling the financial statements according to IFRS requires the use of analytical accounting estimations and judgments regarding the implementations of the accounting principles. Any estimations or assumptions are mentioned in note 3.22.

3.2 New standards-interpretations

1. Standards and Interpretations for current year

IFRIC 19 "Extinguishing Financial Liabilities with Equity Instruments". It is not expected to apply to the Company or Group.

Amendment of IFRIC 14 "Prepayments of a minimum Funding Requirement" It is not expected to apply to the Company or Group.

3.3. Consolidation – Subsidiaries and Associates valuation

The acquisition cost of a subsidiary is the fair value of the assets, the shares issued and the liabilities undertaken on the date of the acquisition, plus any cost directly associated with the transaction. The individual assets, liabilities and contingent liabilities that are acquired during a business combination are valued during the acquisition at their fair value regardless of the participation percentage. The acquisition cost over and above the fair value of the individual assets acquired, is booked as goodwill. If the total cost of the acquisition is lower than the fair value of the individual assets acquired, the difference is immediately booked to the results.

Inter-company transactions, balances and unrealized profits between Group Companies are written-off. Unrealized losses are also written-off as long as there is no indication of impairment of the transferred asset. The accounting principles of the subsidiaries conform to the ones adopted by the group.

Associates are companies on which the group can exert significant influence (but not control), with participation percentages lying between 20% and 50% of the company's voting rights. Investments in associates are valued using the equity method and are initially recognized at cost. The account investment in associates includes the goodwill less any decrease in its value.

The group's share in the profits or losses of associated companies after the acquisition is recognized in the income statement, while the share of changes in reserves after the acquisition is recognized in the reserves. When the group's share in the losses of an associate is equal than its participation in the associate, then, no further losses are recognized, unless further commitments have been made on behalf of the associate.

Participants of the parent company in subsidiaries and associates are valued at cost less any decrease in value.

3.4. Information per sector

- The group has 5 segments, that regard the renting of vehicles in the countries of Greece, Cyprus, Bulgaria, Romania and Serbia.
- The accounting policies for the operational sectors are the same as the ones described in the important accounting policies in the annual financial statements.
- The efficiency of each sector is measured based on the net income after taxes.
- Inter-sector sales refer to managerial support and are invoiced based on cost allocation.
- Operational sectors are strategic units that offer car rental services in different economic environments and are therefore separately controlled by the board of directors.

The Short Term sector address to a great extent foreign tourists, and is therefore highly dependable on the number of incoming tourism during the summer period. As a result, historically over 35% - 40% of total short term revenues are generated during July and August. Hence, it is inevitable that, despite the large contribution of Fleet Management in the company's turnover, and the flat seasonality of that particular sector, Renting sector's seasonality results in substantially larger figures in revenues and most importantly earnings of Autohellas and Demstar (Cyprus) during summer period and lower during the first and last months of the year. In addition, steep seasonality forces the company to hire a large number of seasonable employees and proceed in a number of vehicle purchases and sales at the beginning and towards the end of the season respectively. On the other hand, it is a fact that rents, administrative personnel and other similar expenses do remain stable throughout the year.

The decrease in profit after tax for the period compared to the corresponding of the previous year by € 3,3 million was the result of both reduced turnover, as well as the imposition of an emergency levy on 2009 earnings, under the Law 3845/2010, by a total amount of EUR 1,531,894,73.

Cash on 31.12.2010 are as follows :

	Group	Company
Deposits	81.651.782,45	79.610.083,66
Cash	84.207,46	68.757,47
Totals:	81.735.989,91	79.678.841,13

The increase in cash compared to 31.12.2009 is due to the sale of affiliate Olympic Commercial and Tourist Enterprises SA that was made in cash in September 2010 with a total price of € 28.989.680,00.

3.5. Tangible assets

Own occupied tangible assets are valued in updated (fair) value, every 3 to 5 years. Depreciation is calculated on the updated values. Initial purchase cost includes all costs involved in the purchase. There is no depreciation for plots. All other tangible assets are valued on purchase cost minus depreciation. Depreciation rates are as follows:

Vehicles	2 – 5	Years
Buildings	30 – 35	Years
Mechanical equipment	6 – 7	Years
IT equipment	3 – 4	Years
Other equipment	5	Years

Vehicles' residual values are calculated based on their current values. No evaluations have been made for the residual values of the rest tangible assets.

When the book value of tangible fixed assets exceeds their recoverable amount, the difference (impairment) is immediately booked as an expense in the results.

Upon sale of the tangible fixed assets, any difference between the proceeds and the book value are booked as profit or loss in the results.

3.6. Intangible asset

(a) Trade marks and licenses :

Trade marks and licenses are valued at their acquisition cost less any accumulated depreciations. Depreciation is calculated using the straight line method over their useful lives which is 5 years.

(b) Computer software

Computer software licenses are valued at acquisition cost, less accumulated depreciation. Depreciation is calculated using the straight line method over their useful lives which is from 3 to 5 years.

3.7. Impairment of Assets

Assets that are depreciated are subject to an impairment review when there is evidence that their value will not be recovered. The recoverable value is the greater of the net sales value and the value in use. Impairment losses are booked as expenses when results emerge.

3.8. Financial Assets available for sale, valued at fair value, with changes in fair value recognized in the results.

Financial assets available for sale are valued in their fair value and any change in the fair value, is booked in equity reserves until they are sold or characterized as impaired, at which time they are transferred to the results as profit or loss.

Derivatives which are not designated and effective hedging instruments are valued at fair value with any changes recognized through the income statement.

3.9. Hedging

Derivatives that fulfill the criteria for accounting cash flow hedging are valued in fair value. Any changes in fair value that relates to an hedging are recognized as reserve in fair value through the other income statement and are transferred at the time when cash flow of counterbalanced elements affect the results.

The ineffectual part of the hedging is acknowledged directly in the results. The monitoring of the effectiveness of the hedging (retroactive or future) takes place on each balance sheet date.

3.10. Trade receivables

Receivables from customers are initially booked at their fair value which is equal to their face value less any impairment losses. Impairment losses (losses from doubtful debt) are recognized when there is clear evidence that the group is in no position to collect all relevant amounts, owned on the contractual terms. The impairment loss amount is calculated as the difference between the receivables book value and the expected future cash flow. The impairment losses are recognized in the income statement as expenses.

3.11. Cash and cash equivalents

Cash and cash equivalents include cash, cash at the bank as well as short term (up to 6 months), highly liquid and low risk investments.

3.12. Transactions in Foreign currencies

The transactions that are denominated in foreign currencies are stated in Euros on the basis of the exchange rates that exist on the date of the transaction. On the balance sheet date, monetary assets and liabilities that are denominated in foreign currencies are restated in Euros on the basis of the exchange rates that exist on this date. The gains and losses that arise on restatement are recognized in the income statement.

Any gains and losses arising from the conversion of foreign financial statements are recognized as net worth reserve.

3.13. Share Capital

Common stock is reported as equity. Expenses incurred for the issuance of shares reduce, after deducting the relevant income tax, the proceeds from the issue. Expenses incurred for the issuance of shares for the acquisition of companies are included in the acquisition cost of the company that is purchased.

The cost of acquiring own shares, less the relevant tax, is reported as a negative balance within shareholders equity, until own shares are sold or canceled. Any profit or loss from the selling of own shares (after deducting the relevant costs), is reported as reserve on equity.

3.14. Loans

Loans are initially reported in their fair value, less any relevant transaction costs. From that point on they are valued on the unamortized cost by using the actual interest rate.

3.15. Deferred income tax

Deferred income tax is determined according to the liability method which results from the temporary differences between the book value and the tax base of assets or liabilities. Deferred tax is calculated on the tax rates that are expected to be in effect during the period in which the asset or liability will regain its book value.

Deferred tax assets are recognized to the extent that these will be a future tax profit to be set against the temporary difference that creates the deferred tax asset.

3.16. Employee benefits

(a) Short term benefits

Short term employee benefits in cash and in kind are recognized as an expense when they accrue.

(b) Post employment benefits

Post employment benefits include defined contribution schemes as well as defined schemes. The accrued cost of defined contribution schemes is booked as an expense in the paid period it refers to.

The liability that is reported in the balance sheet with respect to this scheme is the present value of the liability for the defined benefit. The commitment of the defined benefit is calculated annually by an independent actuary with the use of the projected unit credit method. Long-term Greek Government Bonds rate is used for discounting earnings.

3.17. Provisions

Provisions are recognized when the Group has present obligations (legal or constructive), as a result of past events and the settlement through an outflow is probable.

3.18. Recognition of income

Income includes the fair value of goods and services sold, net of value added Tax, discounts and returns. Intercompany revenue within the Group is eliminated completely. The recognition of revenue is done as follows :

(a) Income from services sold (Car Rentals)

Income from services sold are accounted for based on the percentage completion method .

(b) Earnings from car sales

Earning from car sales are recognized at the stage when the basic risks and benefits associated with the ownership of the cars are transferred to the buyer.

(c) Income Interest

Income interest is recognized on a time proportion basis using the effective interest rate.

(d) Dividends

Dividends are accounted as revenue, when the right to receive payment is established, in other words on the date the dividends are declared.

3.19. Leases (Group company as lessee)

Leases of fixed tangible assets, owned by the Group, with which all the risks and benefits are transferred, are registered as financial leases. Financial leases, are capitalized at the inception of the lease and are reported as liabilities with an amount equal to the net lease investment. The income from the payments is reported as a reduction of the liability and as a financial income, in a way that a constant periodic return on the net investment is ensured.

3.20. Dividend Distribution

The distribution of dividends to the shareholders of the parent company is recognized as a liability in the financial statements (parent and consolidated) on the date which the distribution is approved by the General Meeting of the shareholders.

3.21. Financial risk management

Financial risk factors

(a) Credit Risk

The company does not have any substantial credit risk . Retail sales are conducted either through cash payments or credit card charges.

Wholesales are conducted only after a thorough audit on the customer's financial reliability has been conducted, and often advance payments or guarantees are obtained. In addition, the company pays close attention to its credit collection period and acts accordingly. Potential credit risk does exist in the company's available cash, but the company uses recognized financial institutes for its deposits. In addition, the company keeps higher loan liabilities than its deposits in these institutes.

(b) Cash flow Risk

It is kept at very low levels due to the company's high credit limits.

(c) Cash flow Risk and risk of fair value fluctuations due to change in interest rates.

The company is exposed to interest rates risk as it has long term borrowing with adjustable interest rate, which is outbalanced by interest derivatives. The company is currently using no accounting hedges to outbalance interest risk.

3.22 Important estimates

The most important estimate from the company's management for the application of the accounting policies regards the assessment of the vehicles residual value . A moderate decrease in the residual values would result in a major decrease in net income as well as the book value of the vehicles in the next fiscal year, with amounts that are not easy to estimate due to the current market volatility and the large number of different vehicles. This risk is being tackled currently through the company's conservative policy in regard to residual values which resulted in 2010 in a profit of €2.739.141,45 for the group and €1.855.572,30 for the company, even though substantial depreciation rates reductions took place in 2010. However, since late 2010, prices have shown signs of stabilization.

4. Capital management

4.1. The company's policy as far as capital management is concerned is:

- To ensure the company's ability to continue uninterrupted its activities.
- To ensure a satisfactory return to its shareholders, by pricing the services affected in relation to the cost and always looking after its capital structure management.

The management is constantly monitoring the relation between equity and debt. In order for the company to achieve the desirable structure, the company may adjust the dividend, decide to return capital, or issue new shares. The term own capital includes total share capital, share capital paid in excess of par value and other reserves. Owed capital includes borrowing minus cash reserves.

Net borrowing	156,488,517.35	186,847,510.32
Debt / Equity	1.19	1.55

Company aims in retaining the ratio above 1 and up to 3.

4.2. There are certain limitations regarding own capital, deriving from current limited companies' legislation and in particular from Law 2190/1920. The limitations are:

- The purchase of own shares -with the exception of purchasing shares with sole purpose to be distributed among its' employees- cannot exceed 10% of the company's share capital and cannot result in the reduction of own capital to an amount smaller than the amount of the share capital increased by the reserves, for which distribution is forbidden by law.
- In the case where total equity becomes smaller than ½ of the share capital, the Board of Directors is obliged to call up a General Assembly within a period of six months past the end of the fiscal period, in order to decide on the dissolution of the company or to take other measures.
- When the company's own capital becomes smaller than 1/10th of the share capital and the general shareholders meeting does not take the proper measures, the company may be dissolved by court order, on the request of anyone with an interest in law.
- Annually, at least 1/20th of the company's net profit is deducted to form an ordinary reserve, which will be used exclusively to balance, prior to any dividend distribution, the possible debit balance in the earnings carried forward account. Forming such a reserve is not obligatory, once it reaches 1/3rd of the company's share capital.

- The deposit of the annual dividend to shareholders in cash, at an amount equal to at least 35% of the company's net earnings, after deducting the regular reserve and the net result from the evaluation of the company's assets and liabilities at fair value, is obligatory. The above does not apply if the general assembly decides it, by a majority of at least 65% of the total share capital. In this case the dividend that hasn't been distributed and up to an amount equal to 35% of the above mentioned net earnings, has to be reported in a special account "Reserve to be Capitalized", within 4 years time, with the issue of new shares, given to shareholders. Finally, a general shareholders meeting can decide not to distribute a dividend, if it is decided by a majority of over 70%.

4.3 The company is in compliance with all obligations deriving from all relevant provisions and regulations in relation to own capital.

The group records the level of receivables and makes a provision for doubtful debts, if a collection risk is acknowledged. To recognize a possible incapability of collection the group might judge based on how long the debt exists (over one year), the bankruptcy of the debtor or the debtors incapability to meet his payment deadlines in general. Provisions are also considered any amounts that are legally claimed despite any possible partial collection.

In general, the company will claim the receivables in court only after a 3 months grace period has expired and only if the amount justifies the cost of legal action.

Fair value of the receivables are almost identical to their book value. In a similar manner, the maximum credit risk, without taking into account any guarantees and credit assurance, is equal to the receivables book value.

Total guarantees to ensure the collection of the receivables on the 31.12.2010 were 13,464,164.75 and 14,163,114.10 on the 31.12.2009 respectively. These guarantees are registered in the books as liabilities in the account "Trade and other debtors".

Current value of claims from financial leasing on the 31.12.2010 and 31.12.2009, were 9.690.751,67 € and 13.110.988,78 € respectively, gross investment in the lease in €10.326.851,18 and €14.068.372,41 respectively and the non accrual financial expense in 636.099,51 € and 957.383,63 € respectively. 32. Change in Accounting policy

From 01/04/2009 there has been a change in the rate of decay modes of the subsidiaries in Bulgaria from 15% to 18% and in Romania from 17% to 18%, in order to reflect more appropriately the relationship between market value and selling cars in the ongoing financial crisis that is affecting the industry and sector. If subsidiaries in Bulgaria and Romania had not used the rate of 18% but their previous rates of 15% and 17% respectively, the total depreciation of vehicles for the current period would have been reduced by € 692.793,46 with an equal increase results.

33. Sensitivity Analysis

The following table presents and analyses the sensitivity of the company's results and its net worth in relation to the financial assets and liabilities, as far as interest rate risk is concerned, the foreign exchange risk and the market risk.

1. Interest rate risk

The Company and the Group are exposed to interest rate risk, deriving from :

- a) the adjustable interest rate loans, as well as from interest bearing deposits and deposits with adjustable interest rate. The sensitivity analysis assumes the parallel fluctuation of interest rates by ± 100 kps and its impact will be reflected on the results
- b) A change in derivatives fair value used to leverage the interest rate risk, although accounting leverage is not used. These derivatives are affected by interest fluctuations and the sensitivity analysis assumes the fluctuation by ± 100 bps of interest rates and by ± 50 bps of the curve steepness, other things being equal. The impact is reflected on the results.
- c) Change of the fair value of derivatives used for financial hedging of interest risk, where partial hedging is applied. These derivatives are influenced solely by changes in interest rates and the sensitivity analysis assumes interest rates fluctuation of ± 100 bps (base units). The effect is reflected on equity in all cases where hedging is applied and on the results where hedging is not.

2. Foreign exchange risk

a) The company is exposed to a small exchange risk from liabilities in US dollars. The sensitivity analysis assumes change in the exchange rate €/US\$ by $\pm 10\%$ with its impact reflected on the results.

b) The Group is exposed to exchange risk from its subsidiaries' liabilities, in a currency different from their local operating currency. In more detail, the subsidiary in Romania has liabilities in RON and RSD. The sensitivity analysis assumes a change in the exchange rate €/RON by $\pm 10\%$ with the impact reflected on the results.

3. Market Risk

The Company and the Group are exposed to risk from:

Any change of the share price available for sale financial asset. The sensitivity analysis assumes a change in the share price by $\pm 10\%$ and the change is reflected in the Company's net worth.
