Independent review report on interim financial information:

To the Board of Directors of "AUTOHELLAS S.A."

Introduction

We have reviewed the accompanying condensed company and consolidated balance sheet of "AUTOHELLAS S.A." as of 30 June 2018 and the related condensed company and consolidated income statements, statements of changes in equity and cash flows statements for the six-month period then ended, and the selected explanatory notes that comprise the interim condensed financial information, as well as the other information in the six-month financial report. Management is responsible for the preparation and presentation of this condensed interim financial information, in accordance with International Financial Reporting Standards as they have been adopted by the European Union and applied to interim financial reporting (International Accounting Standard "IAS 34"), as well as for the other information included in the six-month financial report. Our responsibility is to express a conclusion on the six-month financial report based on our review.

Scope of review

We conducted our review in accordance with the International Standard on Review Engagements (ISRE) 2410 "Review of interim financial information performed by the independent auditor of the entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing, as they have been transposed into Greek Law, and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information is not prepared, in all material respects, in accordance with IAS 34 and the other information in the six-month financial report, in accordance with article 5 of L. 3556/2007.

B. IMPORTANT EVENTS

C. RISK MANAGEMENT

Exchange Rate Risk

The Group, via its subsidiaries, is operating in Bulgaria, Romania, the Republic of Serbia and in Montenegro and Croatia as far as the Balkan countries are concerned, while also maintaining operations in Cyprus and Ukraine. The existing operations of the Group abroad refer both in short-term and long-term leases. Due to these operations, the Group transacts with clients and suppliers and holds assets and liabilities which are expressed in different currencies than the Euro, which is the reporting currency of the Group. More specifically, the Group's subsidiaries in Romania, the Republic of Serbia, Croatia and Ukraine have liabilities/assets in RON, RSD, HRK and UAH respectively. However, these subsidiaries do not expose the Group into a material exchange rate risk due to their size and the currencies that they use.

Interest rate risk

For the majority of its loans, the Group faces floating interest rates. It is noted that the Company does not have interest-rate derivatives to hedge interest rate risk for floating interest rate loans (Euribor).

Credit Risk

Company does not have any substantial credit risk. Retail sales are mainly made through credit cards and to a small extent in cash. Wholesales take place only after a thorough check on the customer's financial reliability has been conducted, and in most cases advance payments or guarantees are obtained. In

addition, the company pays close attention to its credit collection period and acts accordingly. Potential credit risk does exist in the company's available cash, but the company uses recognized financial institutes for its deposits. In addition, the company keeps higher loan liabilities in these institutes than its deposits.

<u>Market Price Risk</u>

With regard to Market Price Risk, as of 30/06/2018 the Group was exposed to the fluctuation Risk of the stock price of Aegean Airlines S.A. For 2018, there was a positive effect of \in 1.665.701,60 on other comprehensive income of the company. Moreover, Aegean Airlines growth potential should be considered obvious due to its leading industry position.

The company is also exposed in used car price reduction risk. The Group's ability to sell its used car fleet could be reduced due to several reasons, including the macroeconomic environment, changes in the operational model of the Rent a Car sector, regulatory changes (such as changes in taxation, in environmental frameworks, as well as an over-supply of new cars in the market), that will result in a reduction towards the demand of used cars, the subsequent reduction in prices and eventually the value of used cars of the company itself. The company faced and continues to face the risk of lower prices by a higher average fleet age, a strategy that is also used by other companies operating in the sector.

Finally, both the group and the company are exposed in property value changes. During the first semester of 2008 there has been a change in the valuation method of the company's property which are no longer valued based on their historical cost but on their fair value. As a result, changes in the real estate market prices will have an effect in fair values. In the end of 2010 the company revalued its property and no decrease in total value has been recorded. In fiscal year 2012 property was revalued and significant losses of \in 16.504.166,09 were recorded. Finally, in 2013 there was another revaluation of the company's property and an additional loss of \in 4,534,016.30 has been reported. In December 2017 there was another revaluation of the company's investment properties from which an additional profit of \in 1,583,597.92 has been reported and a revaluation concerning the company's own-occupied properties has taken place with a reported loss of \in 2,218,564.33.

D. PROSPECTS

In Greece, operating leasing sector is exhibiting dynamic growth with the company strengthening its presence and significantly expanding its clientele. Outlook for demand in the near future is positive, as is evident also from the rebound in the car market, but at the same time market is characterized by intense competition among the 4-5 major players in the industry.

In the Rent-a-Car business, another year of growth is expected, as Greece appears to be in high demand as a destination for tourists, a fact that is established by the significant growth in international arrivals in the first half of 2018. Along with demand, supply increased as well, with fleet of mid-sized main competitors rising considerably. Autohellas's aim remains to achieve even greater economies of scale, especially in larger areas where important infrastructure enables this, and at the same time continue to improve staff training, fleet utilization and efficient use of new car groups.

Company's engagement in the auto import, distribution and retail sales activities yields results, mainly through the recovery of the market which appears to be on a steady track, as well as through the significant strengthening of its portfolio of products. The addition of the two major brands of Hyundai and Kia, has already a significant impact on initial results with a notable contribution in boosting profitability.

In **Bulgaria**, the economic prospects of the country are very positive, with significant growth rates in sight for another year. Further increase in long-term corporate rentals is expected, with the market increasingly turning to this solution.

In **Cyprus**, the business and economic landscape of the country is showing a significant recovery and the overall prospects of the company remain very positive. Tourism growth is expected with a significant increase in the income of the sector, which will help the Company to achieve significant growth in short-term rentals.

In **Romania**, the prospects for the country's economy remain very positive. A significant increase in the company's revenue is expected, to a large extent due to the significant expansion of the fleet of long-term rentals.

In **Serbia**, building on the first half of 2018, we look forward to strengthening our leadership position in long-term leases. The company seeks to continue creating new lease agreements with multinationals and local companies with healthy financials.

In **Montenegro**, another year of significant tourist growth is expected due to the favorable international environment. Our company looks forward to strengthening its leadership position in the short-term rentals sector, while further enhancing its portfolio of long-term leases.

In **Croatia**, the country's growing tourism volumes, coupled with a favorable international environment during the first half of 2018, imply a positive outlook. The company, still only in its third year of operation, aims to capturing a significant market share in short-term rentals, gradually reaching similar levels achieved in more mature markets.

In **Ukraine**, despite the instability of previous years, a small investment is in place, aimed at safeguarding our presence in a significant market for when conditions allow it.

E. RELATED PARTIES TRANSACTIONS

As related parties, according to IAS 24, are, subsidiaries, companies under the same ownership and/or management with the company, affiliated companies and joint - ventures, as well as Members of the Board of Directors, and managerial personnel of the company. The company purchases from related parties goods and services while it offers goods and services to them too.

Company sales to related parties mainly concern consulting services, managerial support, vehicles sales and vehicles renting. Sale prices are usually defined by market terms. Sales of services and goods, to the company, are mainly maintenance services and car repair as well as vehicle sales which are usually conducted under market terms.

The following table, analyzes the balance of receivables, payables and transactions of the company regarding the related parties as they are defined by IAS 24.

Interim Financial Statements for the period ending on 30.06.2018

3. Significant Accounting Policies

3.1. Basis of Preparation of Financial Statements

These financial statements of Autohellas S.A. refer to the period 01.01.2018-30.06.2018. They have been prepared according to International Financial Reporting Standards (IFRS) as these have been adopted by the European Union. The functional currency is the Euro.

These financial statements have been prepared on the historical cost basis with the exception of available for sale financial assets (equity investments) which are measured in fair value and property, which is also measured at fair value as of 2008. For the preparation of the financial statements, with the exception of the impact of the new standards IFRS 9 "Financial Instruments" and IFRS 15 "Revenue from Contracts with Customers" (refer to note 3.2), the same accounting principles, assumptions and calculation methods have been used as the ones used for the annual financial statements of the full year 2017. These financial statements have been approved by the Board of Directors on 11/09/2018.

3.2. New standards, interpretations and amendments

New standards, interpretations and amendments: Specific new standards, standard amendments and interpretations have been issued, which are mandatory for accounting periods starting from 1.1.2018 or later. Group assessment regarding the effect from implementing those new standards, amendments and interpretations is set out below.

Standards and Interpretations Effective for Current Financial Year

IFRS 9 "Financial Instruments"

IFRS 9 replaces the guidance in IAS 39, which deals with the classification and measurement of financial assets and financial liabilities and it also includes an expected credit losses model that replaces the incurred loss impairment model that was applied under IAS 39. In addition, IFRS 9 establishes a more principles-based approach to hedge accounting and addresses inconsistencies and weaknesses in the previous model in IAS 39. The Group applied the standard retrospectively from 1 January 2018, without restating the comparative information of the prior years.

The Company and the Group does not apply hedge accounting and therefore the guidance of the standard with respect to hedge accounting is not relevant to the Company and the Group. With respect to the classification and measurement of financial assets and financial liabilities, the examination of the Group's business model and the cash flow characteristics resulting from the financial instruments, concluded that the Group's financial assets continue to be measured at amortized cost, with the exception that investments in equity and debt securities continue to be measured at fair value through other comprehensive income. IFRS 9, therefore, did not affect the classification and measurement of financial assets and financial liabilities of the Company and the Group.

Furthermore, in accordance with IFRS 9, the Company and the Group are required to recognize impairment provisions for expected credit losses for all financial assets other than those measured at fair value. Trade debtors, lease debtors and other debtors are included in the new impairment model. Management applies the simplified approach of the standard and calculates impairment based on the expected credit losses over the life of these receivables. The effect of applying the new impairment model does not affect the financial statements.

IFRS 15 "Revenue from Contracts with Customers"

IFRS 15 was issued in May 2014. The objective of the standard is to provide a single, comprehensive revenue recognition model for all contracts with customers to improve comparability within industries, across industries, and across capital markets. It contains principles that an entity will apply to determine the measurement of revenue and timing of when it is recognised. The underlying principle is that an entity recognises revenue to depict the transfer of goods or services to customers at an amount that the entity expects to be entitled to in exchange for those goods or services.

The Company and the Group adopted IFRS 15 on 1 January 2018, using the expedient retrospective approach, that is; the transition effect to be collectively recognized in retained earnings while comparative amounts were not restated. Management reviewed customer contracts as well as the expected revenue flows from the sale of goods and provision of services, in order to identify changes in the timing or amount of revenue recognized. Management concluded that there was no effect on the profitability or the financial position of the Company and the Group at the time of first application of the IFRS 15. As a result, no adjustment to "Earnings carried forward" was required as at 1 January 2018.

IFRS 2 (Amendments) "Classification and measurement of Shared-based Payment transactions"

The amendment clarifies the measurement basis for cash-settled, share-based payments and the accounting for modifications that change an award from cash-settled to equity-settled. It also introduces an exception to the principles in IFRS 2 that will require an award to be treated as if it was wholly equity-settled, where an employer is obliged to withhold an amount for the employee's tax obligation associated with a share-based payment and pay that amount to the tax authority.

IAS 40 (Amendments) "Transfers of Investment Property"

The amendments clarified that to transfer to, or from, investment properties there must be a change in use. To conclude if a property has changed use there should be an assessment of whether the property meets the definition and the change must be supported by evidence.

IFRIC 22 "Foreign currency transactions and advance consideration"

The interpretation provides guidance on how to determine the date of the transaction when applying the standard on foreign currency transactions, IAS 21. The interpretation applies where an entity either pays or receives consideration in advance for foreign currency-denominated contracts.

Annual Improvements to IFRS 2014 (2014 – 2016 Cycle)

IAS 28 "Investments in associates and Joint ventures"

The amendments clarified that when venture capital organisations, mutual funds, unit trusts and similar entities use the election to measure their investments in associates or joint ventures at fair value through profit or loss (FVTPL), this election should be made separately for each associate or joint venture at initial recognition.

Standards and Interpretations effective for subsequent periods

IFRS 9 (Amendments) "**Prepayment Features with Negative Compensation**" (effective for annual periods beginning on or after 1 January 2019)

The amendments allow companies to measure particular prepayable financial assets with so-called negative compensation at amortised cost or at fair value through other comprehensive income if a specified condition is met—instead of at fair value through profit or loss.

IFRS 16 "Leases" (effective for annual periods beginning on or after 1 January 2019)

IFRS 16 has been issued in January 2016 and supersedes IAS 17. The objective of the standard is to ensure the lessees and lessors provide relevant information in a manner that faithfully represents those transactions. IFRS 16 introduces a single lessee accounting model and requires a lessee to recognise assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. IFRS 16 substantially carries forward the lessor accounting requirements in IAS 17. Accordingly, a lessor continues to classify its leases as operating leases or finance leases, and to account for those two types of leases differently. There is no effect by this standard for the Group.

IAS 28 (Amendments) "Long term interests in associates and joint ventures" (effective for annual periods beginning on or after 1 January 2019)

The amendments clarify that companies account for long-term interests in an associate or joint venture—to which the equity method is not applied using IFRS 9. The amendments have not yet been adopted by the EU.

IFRIC 23 "Uncertainty over income tax treatments" (effective for annual periods beginning on or after 1 January 2019)

The interpretation explains how to recognize and measure deferred and current income tax assets and liabilities where there is uncertainty over a tax treatment. IFRIC 23 applies to all aspects of income tax accounting where there is such uncertainty, including taxable profit or loss, the tax bases of assets and liabilities, tax losses and credits and tax rates. The interpretation has not yet been adopted by the EU.

IAS 19 (Amendments) "Plan amendment, curtailment or settlement" (effective for annual periods beginning on or after 1 January 2019)

The amendments specify how companies determine pension expenses when changes to a defined benefit pension plan occur. The amendments have not yet been adopted by the EU.

Annual Improvements to IFRS (2015 - 2017 Cycle) (effective for annual periods beginning on or after 1 January 2019)

The amendments set out below include changes to four IFRSs. The amendments have not yet been adopted by the EU.

IFRS 3 "Business combinations"

The amendments clarify that a company remeasures its previously held interest in a joint operation when it obtains control of the business.

IFRS 11 "Joint arrangements"

The amendments clarify that a company does not remeasure its previously held interest in a joint operation when it obtains joint control of the business.

IAS 12 "Income taxes"

The amendments clarify that a company accounts for all income tax consequences of dividend payments in the same way.

IAS 23 "Borrowing costs"

Interim Financial Statements for the period ending on 30.06.2018

The amendments clarify that a company treats as part of general borrowings any borrowing originally made to develop an asset when the asset is ready for its intended use or sale.

3.3. Consolidation – Subsidiaries and Associates valuation

The accounting policy used for the consolidation is the acquisition method. The acquisition cost of a subsidiary is the fair value of the assets given, the shares issued and the liabilities undertaken on the date of the acquisition. The individual assets, liabilities and contingent liabilities that are acquired during a business combination are valued during the acquisition at their fair value regardless of the participation percentage. The acquisition cost over and above the fair value of the individual assets acquired, is accounted as goodwill. If the total acquisition cost is lower than the fair value of the individual assets acquired to the Income Statement.

Intracompany transactions, balances and unrealized profits between Group Companies are eliminated. Unrealized losses are also eliminated as long as there is no indication of impairment of the transferred asset. The accounting policies of the subsidiaries conform to the ones adopted by the Group.

Associates are companies on which the Group can exert significant influence (but not control), with participation percentages lying between 20% and 50% of the company's voting rights. Investments in associates are accounted for using the equity method. Initially they are recognized at cost. The line investment in associates includes the goodwill less any impairment losses.

The Group's share in the profits or losses of associate companies after the acquisition is recognized in the income statement, while the share of changes in reserves after the acquisition is recognized in the reserves. All these changes affect the book value of the investments. In case the Group's share in the losses of an associate is equal to its participation in the associate no further losses are recognized, unless further commitments have been made on behalf of the associate.

Investment in subsidiaries, associates and joint ventures, are measured at cost less any impairment losses in the company standalone financial statements.

3.4. Operating Segments

- The Group operates in three segments, car rental and car & spare parts trade and services in Greece and car rental abroad.
- The accounting policies of the operating segments are the same as the ones described in the significant accounting policies of the annual financial statements.
- The efficiency of the segments is measured on the basis of earnings after taxes.
- Operating segments are strategic units that offer car rental and car sales services in different economic environments and are therefore separately
 monitored by the Board of Directors.

The short term rentals refer to a great extent (regarding Greece) to foreign tourists visiting the country during the summer period. As a result, historically over 57% of total short term revenues are generated during July - September. Hence, it is inevitable that, despite the large contribution of long term rentals to the total revenue and their stability, short term rentals seasonality driving the total revenue and earnings of Autohellas in larger figures during summer months and lower during the first and last months of the year. At the same time, this seasonality is addressed by recruiting seasonal staff and by making fleet purchases and sales before and at the end of the season respectively. On the other hand, it is a fact that rents, administrative personnel and other similar expenses do remain stable throughout the year.

l

The fair value of real estate is estimated using the income approach method, the sales comparison approach, the replacement cost method (when no comparative rentals or sales are available) and the residual value method in cases of empty lots or calculation of building balance value. The value of owner-occupied and investment properties is also estimated using the above-mentioned methods depending on the property.

The value of land is calculated using the sales comparison approach, or, when such data exists, the residual method or a combination of the two.

Regarding the income method, the rental price of real estate varies from $1,70 \in -20,00 \in /m^2$ depending on the location, use and characteristics of the property.

The Gross Initial Yield (GIY) used ranges from 7.0% to 9.0% depending on the location of the property, its use and characteristics.

The latest assessment of the fair value of real estate was performed on 31.12.2017.

ANTERRA DOO was the national franchisee of Hertz Int. in Croatia. Given the significant country prospects in the tourism sector, and hence the short-term rental market, and at the same time in the long-term rental sector, the Group decided its expansion in the country, increasing its size and looking for growth outside of Greece.

On 22.12.2017, the Company proceeded with the acquisition of DERASCO TRADING LIMITED by paying the amount of \in 1,000. It then proceeded to the increase of the share capital of DERASCO TRADING LIMITED, in the amount of \in 20,000,000 with the purpose of acquiring control of 70% of the companies HYUNDAI HELLAS P&R DAVARI SA and AUTODEAL P&R DAVARI SA through the participation of DERASCO to the share capital increases of these companies. Acquisition date of these companies is the 31.12.2017. The companies were consolidated at the balance sheet date as at 31/12/2017, without having any effect on turnover and earnings due to the fact that there was no significant variation in this period. The valuation of net assets acquired and the resulting goodwill is provisional due to the narrow timeframe and will be finalized within 2018. This acquisition strengthens the position of the company in the retail car market, making it one of the leading companies in the sector. The temporary value of goodwill was attributed to the sector of car and spare parts trade and services in Greece. The impairment test carried out did not result in any losses. These provisional values of the acquisition cost and the relative amounts of the companies turnover and earnings, if the acquisition had been made since the beginning of the year 2017, are as follows:
